

# HECTIC TURKEY

**Hectic Turkey** is a community-driven project. We are a Memecoin utility token attributed to the utter hecticness of the **Hectic Turkey**.

**Hectic Turkey** is an everlasting buyback & burn protocol which **buy back & burns** tokens via every PancakeSwap trade **automatically**.

**Burning tokens** reduces the supply and over time, **your tokens will become more valuable** through greater **scarcity**. Just hold tokens in your wallet and watch as **your tokens increase in value!**
